

## FTTH C type Hook, Yk-01

### Product information:

Drop cable clamp Bracket Yk-01 other called FTTH pole bracket is designed to tension or hook drop wire clamps with suitable fiber optical cable in outdoor overhead FTTH network constructions.

### Key Features:

Apply with tension clamp on dead end route  
Compact size but with high mechanical strength  
Galvanized steel material, corrosion resistant and durable  
Can be installed wooden, metal, concrete poles or building by bolt or stainless steel band  
Fixed by stainless steel band(20-10 mm) or four 4mm diameter bolts  
Excellent environmental stability  
Competitive price

### Technical specification:

Product code	Material	MBL,KN
YK-01	Galvanized steel	1.5

The ftth drop cable hook is made of high strength steel, by zinc galvanised production technology, which is available in Jera line factory facility.

The installation of this ftth bracket is very simple,it can be fixed on wooden, metal ,concrete pole or building by stainless steel straps and bolts. Even this bracket is lightweight product but it has high mechanical strength and provide excellent environmental stability.

FTTH pole bracket passed a series of standard related type tests which are available in our internal laboratory, such as +70°C~40°C Temperature and humidity cycling test, Tensile strength test, Aging test,Corrosion resistance test etc.

The package of this drop clamp hook is simple carton box. The pallet packing method is available as well, check more details with our sales.

Jera line is a direct Drop cable clamp Bracket factory, operating according to ISO 9001:2015, this allow us to sell to over
