

Figure 8 Cable Anchor Clamp, PA-69 (6-9mm)

Product information:

Figure 8 Cable Anchor Clamp PA-69 other called fttth cable anchor clamp, is designed to tension and anchor figure 8 cable or round ADSS cable on outdoor aerial FTTH solutions.

Technical specification:

Product code	Messenger diameter size,mm	Material	MBL,KN	Bail length,mm
PA-69	6-9	UV resistant plastic, stainless steel	2.5	230

Product analogs: PA-500, PA-3000, PA-06, PA-08

This anchor clamp's body is made of UV resistant thermoplastic, with manufacturing process of plastic injection technology which is available at Jera line factory. Stainless steel wire bail is rust-proof and provide high mechanical strength which guarantee long time usage and it can be attach on pole brackets, wall angles and hooks easily.

The installation of this fttth tension clamp is very easy and convenient, self-adjusting wedges, which provide the tool free installation, and easy attaching of ADSS cable by hands.

Anchoring clamps passed a series of standard related type tests which are available in our internal laboratory, such as +70°C~-40°C Temperature and humidity cycling test, Tensile strength test, Aging test, Corrosion resistance test etc.

The package of this anchor clamp is simple carton box. The pallet packing method is available as well, check more details with our sales.

Jera line is a direct figure 8 cable anchor clamp factory, operating according to ISO 9001:2015, this allow us to sell to over 40 countries and regions such as CIS, Europe, South America, Middle East, Africa, and Asia.
