AC1200 Whole Home Mesh WiFi System

Product Description

The Tenda nova MW5s is a whole home mesh WiFi system designed for medium-to-larger sized households that have high speed broadband services coming into your home. Powered by Tenda's proprietary mesh technology, creating a distributed network throughout your home. A 3-pack of the MW5s covers up to 3500 square feet and works well behind multiple walls. The primary node features gigabit ports, getting the most out of your high speed broadband service and ensures smooth streaming of 4K videos. The secondary nodes automatically connect using pre-paired configurations, making setup a breeze. All of these make the Tenda nova MW5s an ideal choice for whole home WiFi coverage.

More features

- * Easy setup: The secondary node automatically connects to the primary node making cabling unnecessary.
- * Parental Controls: Manage your child's online time.
- * Security: Supports access control and guest network.

Selling Points

Works well with high speed broadband

With 2 gigabit ports included, the MW5s gets the most out of your high speed broadband services coming into your home.

Covers up to 3500 square feet

Powered by Tenda's proprietary mesh technology, each node automatically connects to the other, creating a distributed network throughout your entire home. A 3-pack of nova MW5s covers up to 3500 square feet. Go big and easily expand your WiFi network in the future simply by adding nodes.

Two external power amplifiers for each band to enhance the whole WiFi coverage

Two external power amplifiers used both on 2.4 GHz and 5 GHz bands of the primary node to enhance the signal strength and receiving capability, helping the nova MW5s outperform ordinary routers.

Built-in dual band antennas for excellent wall penetration capability

With features that optimize both the 2.4 GHz and 5 GHz bands, the nova MW5s system automatically adjusts the data rates when it works behind multiple walls.

RF optimization for excellent wall penetration performance

By optimizing matching circuits and applying Maximal Ratio Combining (MRC) technology, the nova MW5s dramatically improves WiFi transmission, increasing wall penetration and distributing much broader WiFi coverage.

Selling Points

Beamforming technology concentrates the signal for better wall penetration

Powered by Beamforming technology, the nova MW5s projects a stronger WiFi signal in a direction where your devices are located. Instead of just broadcasting signals to a wide area, Tenda's Beamforming concentrates the signal and aims it directly at the target.

Automatic networking makes setup a breeze

All nodes are delivered pre-paired right out of the box, making the system easy to setup and an ideal choice for whole home WiFi coverage.

Supports up to 60 devices

Combining the 1 GHz main chip with MU-MIMO technology, the nova MW5s communicates simultaneously with multiple devices, ensuring a lag-free internet connection when you enable the Capacity-oriented Mode using the App.
