Real-Time Tracking

Report & Data Management

Device Management

Job & Work Management

# DESCRIPTION

View Pro Management System is an integrated cloud-based software platform for INNO's splicers. This innovative web-based application allows both technicians and managers of the splicers to maximize the use of its assets and to achieve the highest work efficiency. Real-time communications with tiered access rights and options to manage job orders, manage splicing machines, and send/receive reports are only a small part of the innovative work processes offered by the View Pro.

## DASHBOARD

**Job/Work Management**  
Share and manage job/work to maximize efficiency and productivity

**Device Management**  
Manage splicers' maintenance & service needs such as SW update, calibration, spare parts

**Pop-up Alerts/Messages**  
Automatic alerts and messages to indicate a machine's status

**Web/Cloud-Based Service**  
Accessible via PC with tiered access rights and authorities

**Real-time, Seamless Reporting**  
Splice results, locations, reports, and other data can be retrieved instantaneously

## REAL-TIME, LIVE MANAGEMENT

IoT module built into the splicer allows for real-time and live communication via a mobile network. Comprehensive analytics and information can now be obtained remotely for asset and productivity enhancement.

## CENTRALIZED REPORTS & DATA

INNO's cloud-based service offers centralized reports and data management eliminating the need to store and retrieve data and reports using USB or through a physical connection.

## JOB/WORK MANAGEMENT

The system automatically records and archives job/work completed. A user with relevant access rights will be able to analyze and distribute workloads to realize the maximum work efficiency.

## DEVICE MANAGEMENT

A splicer's maintenance, calibration, and replacement of spare parts can be managed through the platform to keep the machine at its optimal state. Software updates can now be made via the cloud.
